## INEQUALITY AND WELL-BEING TRENDS POST COVID-19 PANDEMIC

---

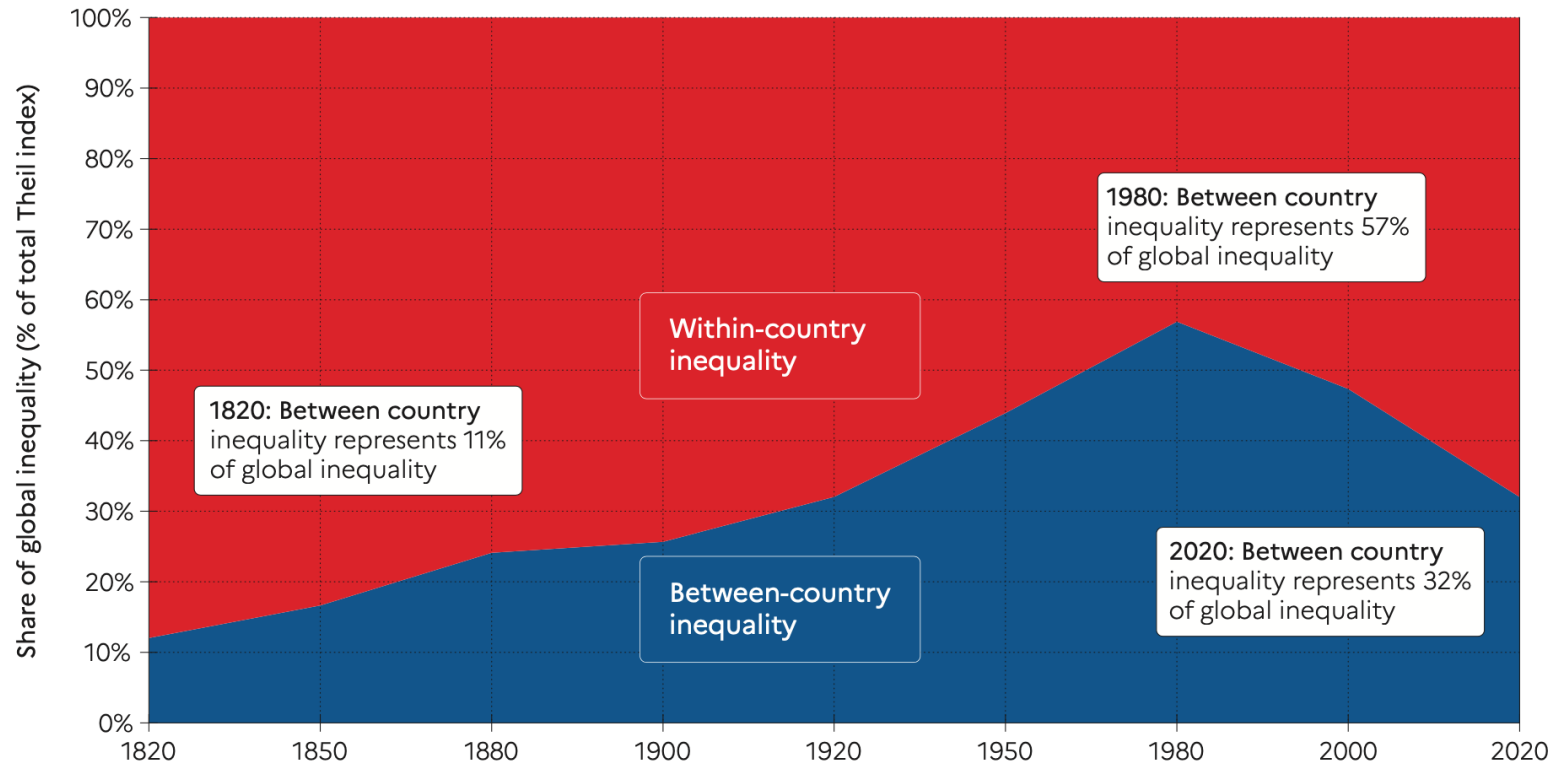

6 SEPTEMBER 2022

Dennis Görlich

## INEQUALITY AND WELL-BEING TRENDS

### BETWEEN- AND WITHIN-COUNTRY INEQUALITY

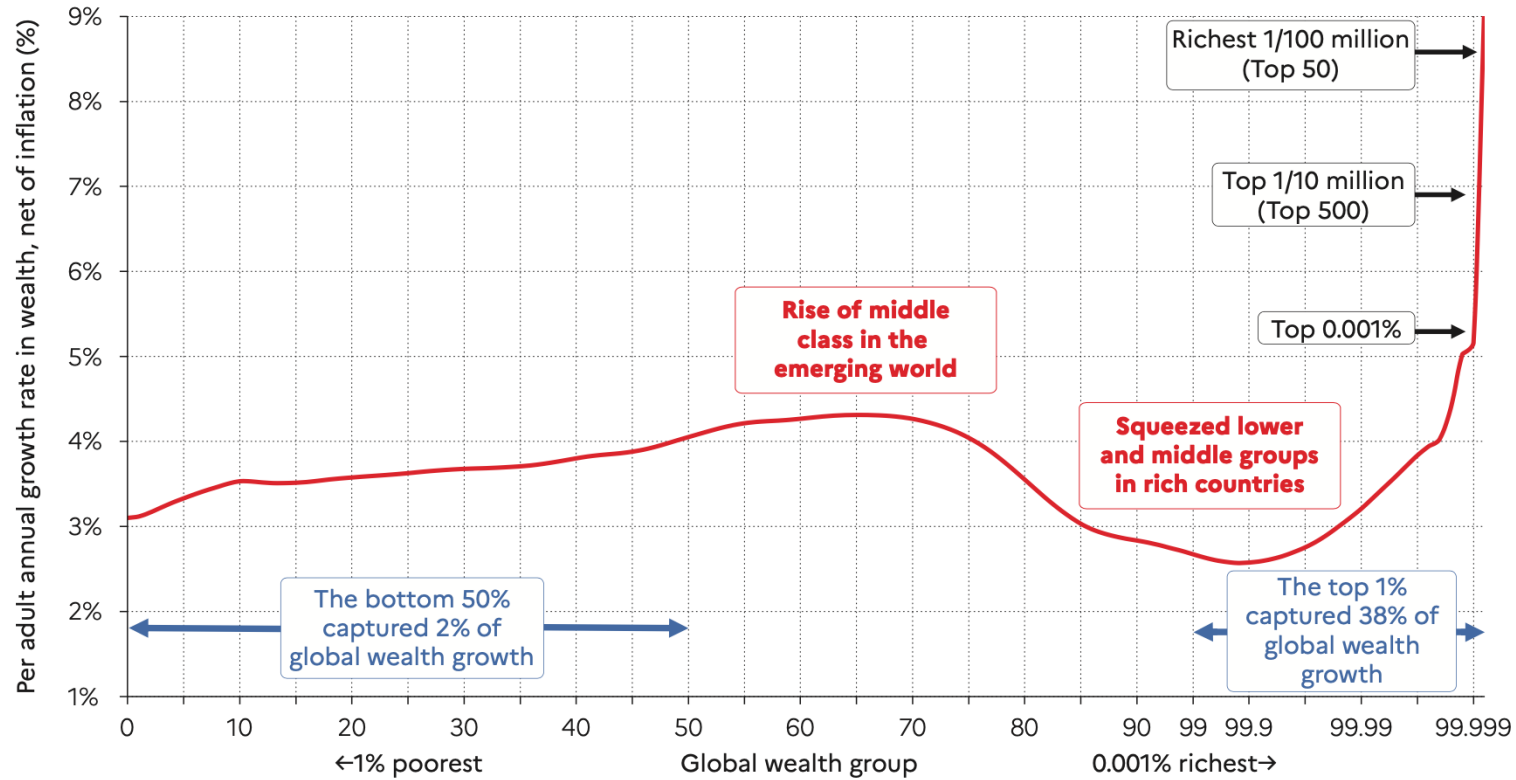

**Figure 6** Global income inequality: Between vs. within country inequality (Theil index), 1820-2020

DYNAMICS IN THE DISTRIBUTION OF WEALTH GAINS

**Figure 9** Average annual wealth growth rate, 1995-2021

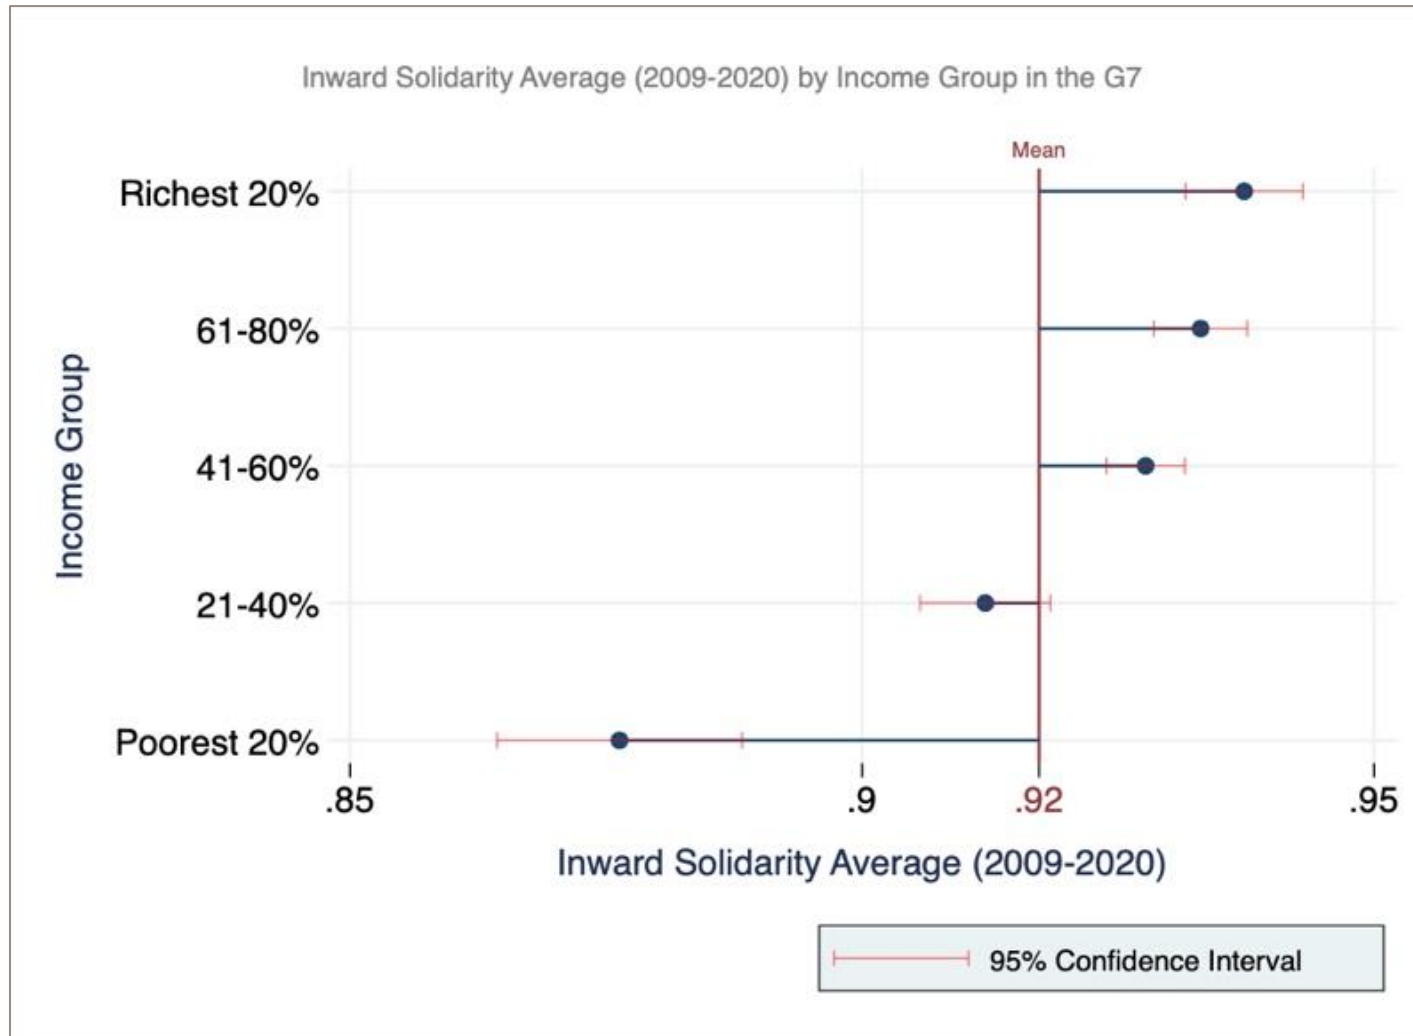

## WHAT ELSE MATTERS FOR WELL-BEING?

---

- Income & Wealth are correlated with well-being.
  - But they are **not the only** indicators!
- Snower & Lima de Miranda developed the „**SAGE Dashboard**“
  - A normative framework of measures to characterise well-being:

SOLIDARITY BY INCOME QUINTILE

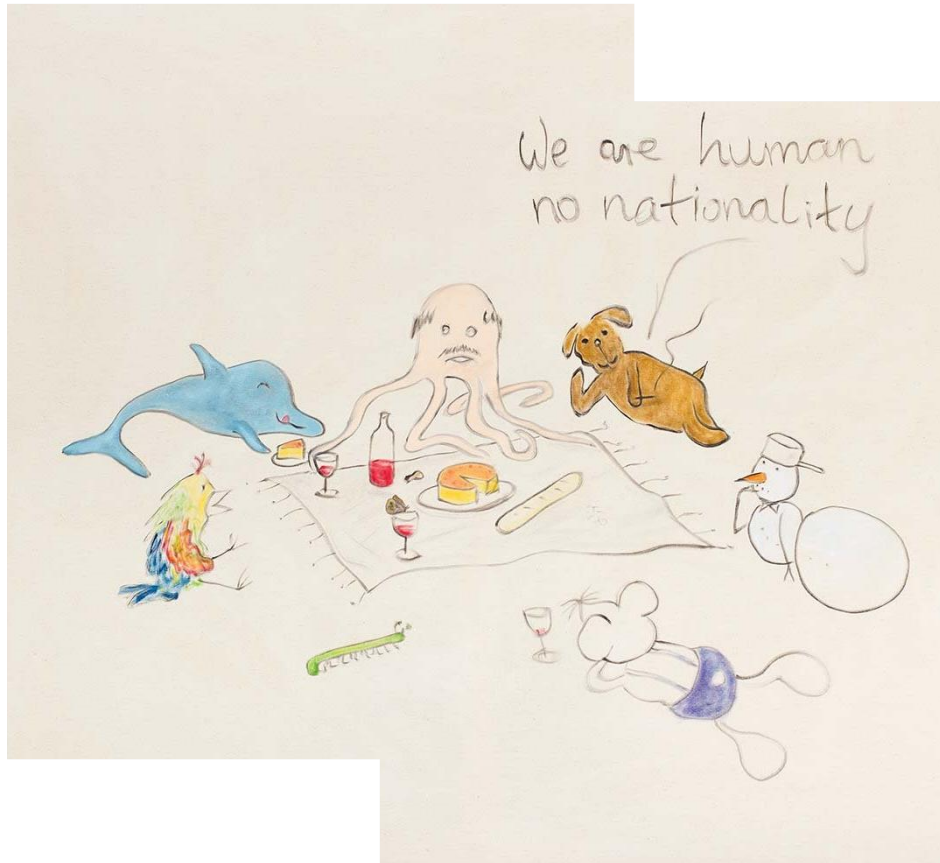

*Note:* Data for inward solidarity is sourced from the Gallup World Poll and represents the percentage of people who respond “yes” to the following question: “If you were in trouble, do you have relatives or friends you can count on to help you whenever you need them, or not?”

## A GLOBAL CHALLENGE?

---

- Yes, it is a global challenge!
- cohesive and empowered societies are ready to manage:
  - Crises (climate change, pandemic)
  - Economic transformation
- Develop policies that strengthen solidarity and agency!

Work with us on a broader concept of prosperity
