# ABOUT SMERU

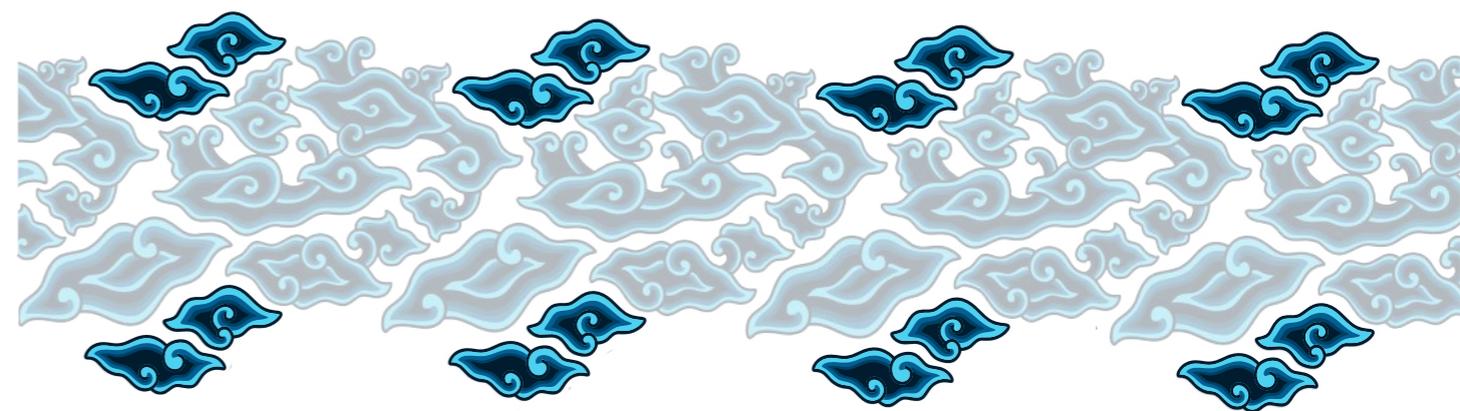

The SMERU Research Institute is an independent institution for public policy studies and has been a leader in poverty and inequality research in Indonesia. Our work focuses on areas of socioeconomic research that are of fundamental importance to contemporary development issues in Indonesia. We specialize in poverty analysis, policy research, and monitoring and evaluation. These three interconnected elements of knowledge production are directed to support evidence-based policy formulation that works for Indonesia's poorest and most vulnerable people.

## VISION

**A creation of an Indonesian society free of absolute poverty and high inequality through research aimed at evidence-based poverty and inequality reduction strategies, policies, and actions**

## MISSION

- Carrying out research on poverty-related issues for the purpose of improving public and private sector policies and their implementation
- Conducting effective outreach to national and regional governments, civil society, academics, the international community, and the private sector
- Supporting inclusive public and private sector policy discourses on poverty and inequality reduction strategies
- Strengthening the role of civil society in the formulation and implementation of public and private sector policies

The SMERU Research Institute (retired), Jakarta

Mukti Mulyana/SMERU

The Government of Indonesia has launched Indonesia's Vision 2045, which has four pillars: Human Development and Mastery of Science and Technology, Sustainable Economic Development, Equitable Development, and Strengthening National Resilience and Governance. As a research institute, we see the opportunity for SMERU to contribute to the support of the four pillars. This stems from the awareness that in carrying out their duties, public policymakers in the future will increasingly depend on empirical evidence derived from research results. For this reason, it is necessary to improve the quality of research in the fields of education and economy, and expand the dissemination of the results to reach policymakers both at the national and regional levels. SMERU consistently works in evidence-based pro-poor critical thinking academic discourse and policymaking.

The year 2019 was a year of change for SMERU. In August 2019, Widjajanti Isdijoso was elected to continue SMERU's leadership, replacing Dr. Asep Suryahadi. At the same time, I was honored to be appointed as Chairperson of The SMERU Foundation's Trustees, replacing Dr. Syaikh Usman. The smooth transition of SMERU's leadership is a good sign for the sustainability of this research institute. With the new leadership, hopefully SMERU can continue to increase the trust of and expand its reach to all its stakeholders.

This year SMERU mourned the passing of a highly respected figure, Dr. Joan Hardjono, who had been active for almost twenty years as a member of SMERU's Trustees. The role of the late Joan, who always emphasized the importance of research quality and integrity, has contributed greatly to SMERU's achievements throughout the years. Her contribution is very significant in directing SMERU to become a producer of quality knowledge that it is today. Goodbye, Joan, and thank you.

The overall positive track record of SMERU is everyone's success. In particular, we thank Dr. Asep Suryahadi for his loyalty, competence, and dedication during the ten years of his leadership in SMERU. We express our deepest gratitude to the Department of Foreign Affairs and Trade (DFAT), the Ford Foundation, the International Labor Organization (ILO), and the World Bank for all the support that enables SMERU to continue research. We would also like to thank the Australian Government, the British Government, and the Bill & Melinda Gates Foundation for funding the Research on Improving Systems of Education (RISE) programme in Indonesia. We convey our respect to the central and regional—including village—governments for having helped to create a conducive environment for our research and the use of its results. SMERU believes that the process of formulating evidence-based policies is the right way to improve the welfare of the Indonesian community. 🐟

*Sudarno Sumarto*

Mukti Mulyana/SMERU

In August 2019, I was entrusted to receive the leadership baton from Dr. Asep Suryahadi to be the director of The SMERU Research Institute. This is by no means an easy task considering the various accomplishments made by SMERU during his term. Still, my optimism remains as Dr. Suryahadi is still with SMERU as one of its senior research fellows, and the entire SMERU staff is still fully committed to undertaking the institute's vision and missions.

Throughout 2019, SMERU continued to demonstrate its commitment to contribute to policymaking and improvement of stakeholders' understanding of the importance of a more inclusive as well as research-based policymaking. In response to the trust given to SMERU by various ministries/government institutions and development partners, SMERU has delivered several policy recommendations on issues such as rural development, more inclusive economic development, livelihood development for Family of Hope (PKH) beneficiaries, stunting reduction and prevention, and increase of access to quality education.

With the support of the Ford Foundation and Knowledge Sector Initiative (KSI)-DFAT, SMERU has assisted the Ministry of National Development Planning/National Development Planning Agency (Bappenas) in creating the Inclusive Economic Development Index, which provides data down to the *kabupaten* (district)/*kota* (city) level. The index can be used as a basis for policymaking and a tool for monitoring the quality of economic growth.

In the education sector, through the RISE Programme in Indonesia (supported by the RISE Programme), SMERU has delivered policy recommendations on teacher recruitment, training, and capacity building. By collaborating with the private sector and civil society organizations, SMERU has conducted studies to support policies that aim to eliminate child labor in the agricultural sector. With the support of the MAMPU-DFAT Program, SMERU also conducted studies on women's access to public services. In addition, to keep encouraging the formulation of pro-poor policies, SMERU has organized training sessions on poverty reduction policy analysis for ministry staff as well as academics.

At the end of July, SMERU held the Regional Development Forum (FPD) in cooperation with the West Java Provincial Government, and a national seminar in cooperation with the SDGs Center of Universitas Padjadjaran. Earning the trust to be West Java Provincial Government's partner in reducing poverty has been an honor for us. At the end of the year, all the hard work of SMERU staff and management gained recognition from the government in which SMERU was awarded for its contribution in the success of the PKH program implementation.

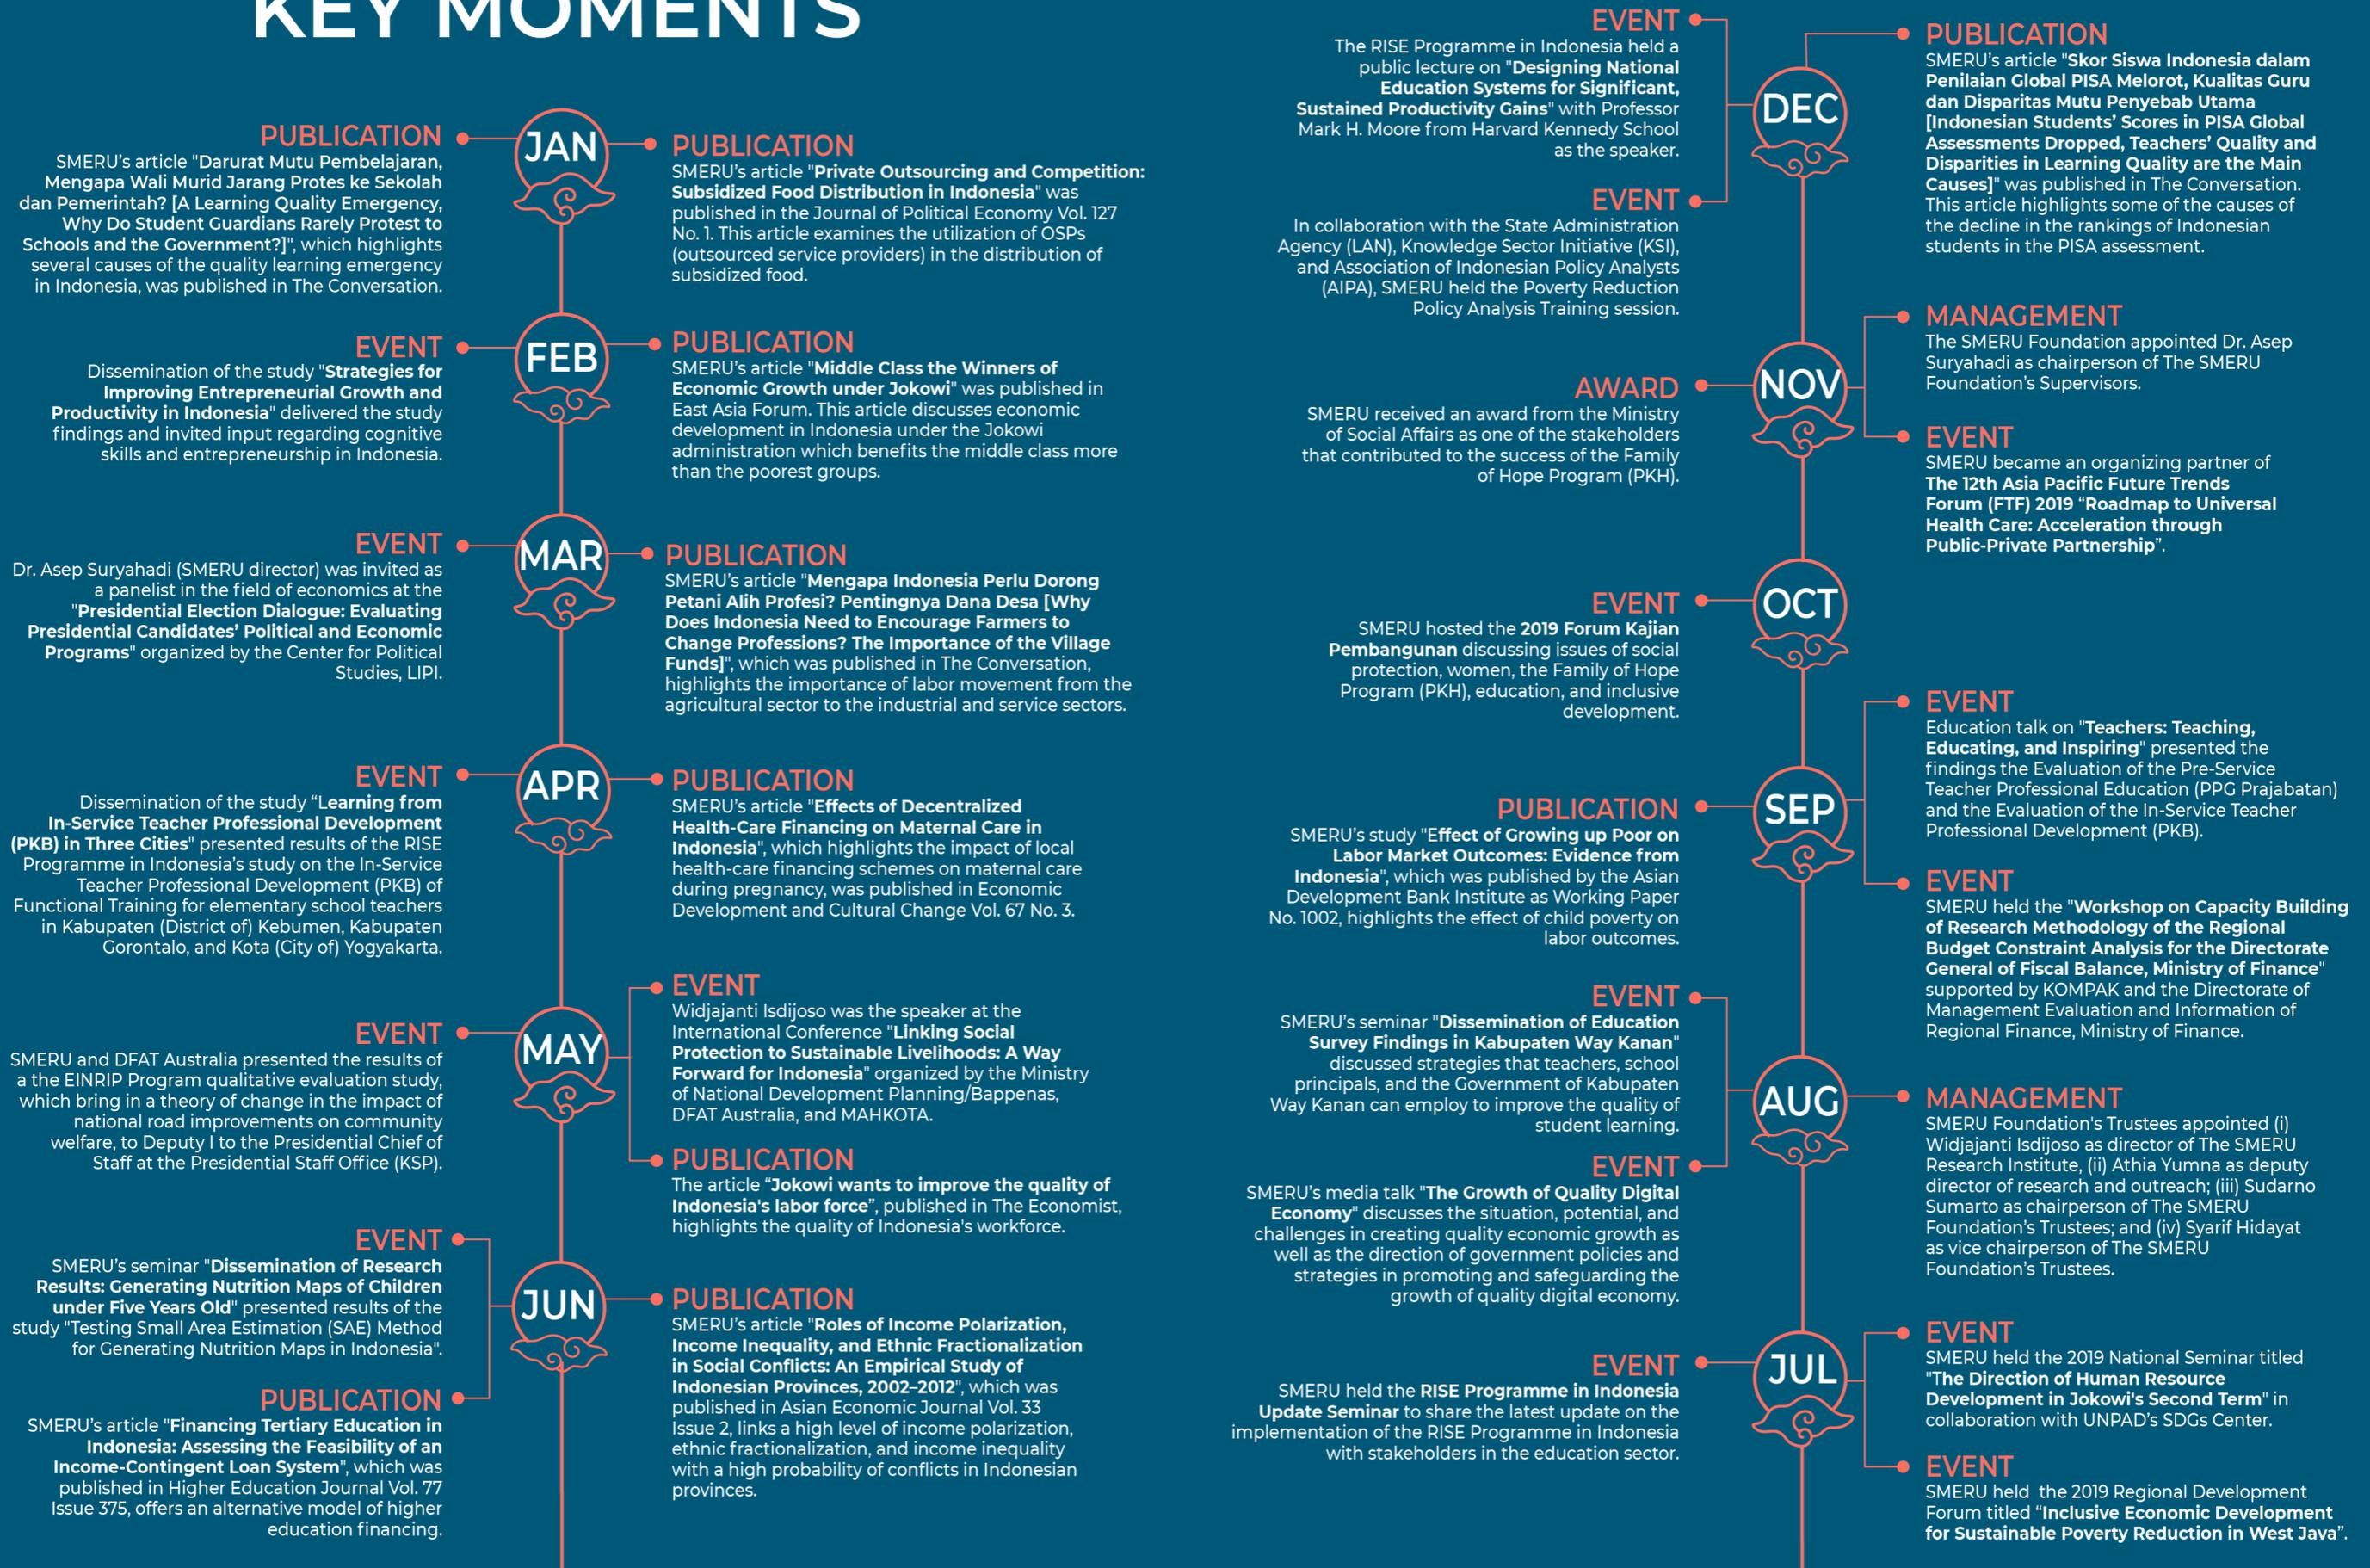

This year marks the end of the period for the implementation of SMERU's 2015–2019 Strategic Plan. Successes and failures during these five years have become an invaluable experience for SMERU in preparing its 2020–2024 Strategic Plan. The plan is directed toward continued strengthening of our contribution to the achievement of an equitable development in support of the poor and other marginalized citizens.

Finally, I would like to thank the entire staff as well as all of SMERU's partners for their support, which has made these achievements possible. I would also like to thank them for their faith in me. With the blessing of the God Almighty and the full support of SMERU's staff, I will do my best to perform my role as SMERU's director. Together we will make SMERU's vision to reduce poverty and inequality in Indonesia a reality. 

*Widjajanti Isdijoso*

DIRECTOR

# KEY MOMENTS

# RESEARCH HIGHLIGHTS

## ADDRESSING A LEARNING CRISIS IN INDONESIA

The Indonesian education system is facing the challenge of addressing a learning crisis. This is due to a number of factors, such as (i) disparities in teacher recruitment, placement, and competency; and (ii) and the gap in students' understanding of basic learning. These situations encourage SMERU to continuously pay great attention to education issues.

SMERU's studies on education under the umbrella of the RISE Program in Indonesia are divided into two domains, namely studies on teacher reform at the national level and studies on education policies implemented by regional governments. The RISE Programme in Indonesia is managed by SMERU in collaboration with the Amsterdam Institute for Global Health and Development (AIGHD) and Mathematica, with funding support from DFID UK, DFAT Australia, and the Bill & Melinda Gates Foundation.

SMERU has recorded a number of important research findings of the RISE Programme in Indonesia throughout 2019. First, research on the Preservice Teacher Professional Education (PPG Prajabatan) program found that teachers' mastery of the teaching materials on literacy and numeracy obtained from the PPG Prajabatan-Elementary School Teacher Education (PGSD) program is still low. Another finding is that the PPG program carried out within the college years of students in the education study program is more effective because they can integrate the knowledge they learn from college with the PPG materials. In addition, PPG can be held within less than one year to make it more efficient. Second, the results of the rapid assessment of junior high school (SMP) new student admissions (PPDB) show that the transition from score-based PPDB to zoning-based PPDB

has allowed a larger number of low-performing students to get enrolled in public schools. Prior to the zoning policy, low-performing students usually attended private schools which have fewer resources than most public schools.

Besides conducting studies through the RISE Programme in Indonesia, SMERU also conducted a number of studies in other areas of education, namely an evaluation of the Global School Leaders program supported by the Tanoto Foundation, as well as a study on the Implementation of Schools for Children in Coastal Areas in Jakarta and a study on the implementation of the open junior high schools (SMPT) in Jakarta with the support of the DKI Jakarta Education Agency. The evaluation results of the Global School Leaders program show that school principals are not aware of the low quality of teaching of teachers in schools. This is presumably due to the principal's lack of understanding of the concept of effective teaching. As a consequence, school principals do not improve teachers' teaching techniques which results in teachers not teaching effectively and students' performance not improving. The study on the implementation of schools for children in coastal areas and the study on the Implementation of the SMPT show that affirmative actions are still needed to increase access for children of poor families to quality education.

SMERU is committed to conducting studies on education in the coming years by opening wider opportunities for collaboration with donors, regional governments, and the private sector. This is necessary to improve the education system in Indonesia through quality evidence-based research. 

- Beri tanda centang (✓) untuk ciri-ciri rumah sehat yang lain!
- Sampah berserakan dimana-mana.
  - Memiliki sumber air yang bersih.
  - Halamannya luas.
  - Saluran air tidak mampet.

## ADDRESSING PROBLEMS OF CHILD LABOR IN AGRICULTURE

A report by Statistics Indonesia suggests that, in 2009, about 1.7 million children aged 5–17 years were child laborers and 58% of them worked in the agricultural sector. During 2019, SMERU conducted at least three research projects related to the issue of child labor in tobacco farming. SMERU conducted these projects in collaboration with the ECLT Foundation, International Labor Organization (ILO), and Philip Morris International (PMI).

The first project titled “Baseline Study on Child Labour in Tobacco-Growing Areas in Indonesia” was supported by ECLT. This study is aimed at seeing the situation of the child laborers prior to the implementation of the Strategic Partnership Program for Overcoming Child Labor in Agriculture in Indonesia (KESEMPATAN). The KESEMPATAN program was developed as a follow-up of the “Diagnostic Study of Child Labour in Rural Areas (with Special Emphasis on Tobacco Farming)” conducted in 2016. In addition to measuring the prevalence of child labor in tobacco growing, the 2019 baseline study learned the design and plans of the program. Then, based on the study results, recommendations were made for the improvement of the program’s design. This study was designed to be part of a longitudinal study in the 2019–2021 period which is hoped to generate lessons about the efforts of eliminating child labor in tobacco growing.

The second project was supported by ILO. It is aimed at measuring risks and dangers faced by children working in tobacco growing in Indonesia. Although the preliminary findings of this study show that the child laborers face 0.6 time lower of a risk than that faced by the adult farmers/farm laborers, still they are vulnerable to dangerous conditions of exposure to pesticides and tobacco leaves’ nicotine as well as dust and heat. This study shows that the community is still permissive of

children working on tobacco growing, even though the government, health workers, and tobacco growing companies have issued a ban on child labor on tobacco growing. The community is still not aware of the dangers faced by child laborers. Therefore, in this study, measurements of heat and dust exposure, as well as pesticide and nicotine content in children working on tobacco growing were carried out.

Besides seeing child labor’s involvement, the third project specifically looks at the use of use personal protective equipment (PPE) in tobacco growing. This study on external monitoring and verification of the impacts of PMI’s Agricultural Labor Practices (ALP) program in Indonesia found that only some of the tobacco farmers have been aware of the danger involved in pesticide utilization and have used PPE. Despite the fact that quite many farmers realize the importance of using PPE, some choose not to use it because they feel uncomfortable wearing it. Compared with the contracted farmers, those who are not in contract relation with multinational tobacco companies have a much lower level of awareness of the danger of pesticides. The number of contracted tobacco farmers are far fewer than the non-contracted ones. Therefore, more comprehensive efforts to improve the non-contracted farmers’ awareness of the danger of pesticides as well as the importance of using PPE are needed.

The findings of these three SMERU studies have been presented to the government and nongovernment stakeholders on various occasions. Recommendations of the first and second studies will be the input for the development of programs for eliminating child labor in tobacco growing. Meanwhile, recommendations of the third study are used as feedback for improving the ALP program in Indonesia. 🐟

Children working in tobacco growing plantations are 20 times more likely to be exposed to pesticides than those who do not.

## UNDERSTANDING NUTRITION-RELATED ISSUES AND EFFORTS TO OVERCOME THEM

Indonesia is still facing a number of problems related to nutritional status and food security. Although the Basic Health Survey (Riskesmas) results show that the stunting prevalence in Indonesia decreased from 37.2% in 2013 to 30.8% in 2018, such figure is still far above the prevalence threshold for stunting set by the World Health Organization (WHO), which is 20.0%. In addition, Indonesia still has children under five years old suffering from wasting, and there is also a tendency for the prevalence of overweight children under five to rise.

SMERU has paid serious attention to nutrition and food security issues. In the past two years, SMERU has conducted three studies on nutrition and food security with varying perspectives, scope, and forms of partnerships.

First, in cooperation with World Food Programme (WFP), SMERU conducted the “Update to the Strategic Review of Food and Nutrition Security in Indonesia”. This study is an update to a similar document prepared by SMERU and WFP in 2014. This review shows that domestic foodstuff production, especially protein-rich foodstuffs, fruits, and vegetables, still needs to be increased. Indonesians also suffer from triple burden of malnutrition—malnutrition, caloric surplus, and deficiencies of micronutrients, which are sourced from vegetables and fruits, due to excess of carbohydrates and sugar. Specifically to reduce the stunting prevalence, the government has since 2017 made efforts to improve the targeting of their stunting reduction programs, but their efforts are not yet effective because of the lack of coordination between institutions and low level of understanding of factors affecting stunting.

Second, SMERU conducted the study “Analysis of Public Expenditure for Stunting Prevention at the Regional Level: Factors Affecting Variations of

Stunting Prevalences in Six *Kabupaten/Kota* in Indonesia.” The study conducted in cooperation with the World Bank finds that variations in regional public expenditure are not sufficient to explain the varied stunting prevalences in the study locations. Stunting prevention has faced challenges in relation to regional governments’ capacities in program planning, budgeting, implementation, monitoring and evaluation, as well as coordination between actors and sectors of the programs.

Last, in cooperation with the World Bank and Tanoto Foundation, SMERU conducted a study which tried using a small area estimation (SAE) method to generate nutrition maps in five *kabupaten* (districts) in Indonesia. The estimation results show that the SAE model is proven to be adequate in estimating stunting prevalences down to the village level. In this study, the researchers also conducted verification using an anthropometric census for children under five years old in three villages of each *kabupaten*. The results show that among the factors influencing the decrease in stunting are increased parental educational attainment, community welfare, and access to clean water and adequate sanitation facilities.

The three studies give an overview of the challenges in improving food security and nutrition at the national, regional, and community levels. Wider dissemination of the study results will take place in 2020 and those results are targeted to serve as feedback for improving relevant policies. SMERU’s experience in cooperating with the Tanoto Foundation also demonstrates the interest of and need for the domestic private sector to use research-based evidence to increase the effectiveness of their assistance to regional governments and communities. 🌐

Among the factors influencing the decrease in stunting are increased parental educational attainment, community welfare, and access to clean water and adequate sanitation facilities.  
[Location: Tasikmalaya, West Java]

## SUPPORTING THE IMPROVEMENT OF SOCIAL PROTECTION SYSTEM

The issue of social protection remained a concern of The SMERU Research Institute throughout 2019. There are at least three studies in relation to the issue, which were delivered on various occasions, both in academic forums and policy discussion forums.

The first study “Rapid Assessment under Unideal Situation-The Impact of the Indonesian National Health Insurance on Poverty: A Microsimulation” was presented by Goldy Fariz Dharmawan at The Indonesian Health Economics Association (InaHEA) Annual Scientific Meeting on 6 November 2019 in Bali. The study aims to look into the risks faced by the poor if they do not have the National Health Insurance (Jaminan Kesehatan Nasional/JKN). Simulation results of the study show that JKN can lift around 1.18 million people out of poverty. They also show that, without JKN, some of the poor will have to incur out-of-pocket expenses, which can even reach 12.3 million rupiah, when accessing health services.

The second study “The Effectiveness of Cash Transfer in Reducing Poverty and Inequality: Evidence from Two Programs in Indonesia” was conducted by Niken Kusumawardhani, Ridho Al Izzati, and Asep Suryahadi. The study seeks to examine the impact of conditional cash transfers on poverty. Results of the study show that social protection programs, such as PKH, contribute to reducing poverty but do not significantly reduce inequality. These results were presented at one of the 2019 Forum Kajian Pembangunan (FKP) seminar series organized by The SMERU Research Institute in Jakarta.

The third study focuses on the livelihoods of beneficiary households of the Family of Hope Program (PKH). The study is a collaboration between The SMERU Research Institute, Menuju Masyarakat Indonesia yang Kokoh Sejahtera (MAHKOTA), and the Ministry of Social Affairs, which was officially launched on 13 February 2020 in Jakarta. Results of the study show that although PKH has provided additional income for poor households, the government still needs to design a comprehensive and integrated system to develop livelihood strategies for poor households and reduce their dependence on PKH assistance. The report of this study includes intervention options that can be utilized by the government. In November 2019, The SMERU Research Institute received an award from the Ministry of Social Affairs as one of the stakeholders who had contributed to the success of PKH. The award was presented by the Minister for Social Affairs, Juliari P. Batubara, himself at the 2019 PKH awards ceremony.

These studies show that quality research is a prerequisite to understanding the benefits of social protection programs and their impact especially on the poor and vulnerable. In addition, the government still needs to develop a comprehensive social protection system which is integrated with a sustainable livelihood program to economically empower the poor and vulnerable and reduce their dependence on social assistance. 🐟

The government still needs to develop a comprehensive social protection system which is integrated with a sustainable livelihood program to economically empower the poor and vulnerable and reduce their dependence on social assistance.

## INCLUSIVE PERSPECTIVE FOR SUSTAINABLE POVERTY REDUCTION

Indonesia's economic growth has remained at 5%–6% for the past ten years. The poverty rate also kept decreasing from 14.2% in 2009 to 9.41% in 2019. Although the economic growth has managed to lower the poverty rate, it has not affected the inequality rate, which has stagnated at 0.38–0.41.

The stagnant, high rate of inequality indicates that not all groups in the community have been enjoying the same economic growth. The middle and upper classes enjoy faster growth than their lower counterpart. The unwanted result from high inequality is the risk of a slowdown in economic growth, which in turn will weaken a region's ability to reduce poverty.

Such situation is illustrated by a study conducted by SMERU in Kabupaten Pangkajene dan Kepulauan (Pangkep). It is a diagnostic study conducted with the support of Knowledge Sector Initiative (KSI) under the memorandum of understanding (MoU) between SMERU and Kabupaten Pangkep Institute of Research and Development (Balitbangda). This study offers a perspective that the high economic growth in Kabupaten Pangkep is not necessarily followed by a low poverty rate. Areas where economic activities still rely on extractive natural resources are prone to such condition especially because the economic activities are more capital-intensive rather than labor-intensive.

The involvement of various groups of the community is necessary to accelerate poverty reduction. In other words, the government needs to push for the creation of economic development policies that are more inclusive by increasing access and opportunities for all sections of society, especially the poor and those who have been marginalized all along, to be involved and to reap the fruits of development. Therefore, the gaps between groups and regions can soon be reduced.

In addition, SMERU also continues to provide support for the use of the Inclusive Economic Development Index which has been developed together with the National Development Planning Agency (Bappenas) since 2017. In 2019, a series of studies and discussions were conducted on the use of the Index to increase development inclusiveness with seven provincial governments: Aceh, East Kalimantan, South Sulawesi, East Nusa Tenggara, Bali, Banten, and West Java. In the occasions, discussions on the pillars and indicators of the Index at the provincial level as well as at the *kabupaten/kota* level in each province were carried out. The formulation of the Index down to the *kabupaten/kota* level is a follow-up cooperation with Bappenas with the support of the Directorate General of Regional Development of the Ministry of Home Affairs and Ford Foundation. With the Index reaching the *kabupaten/kota* level, local governments, academics, and the community have one additional reference tool to identify various development indicators that need to be improved so that economic development in an area becomes more inclusive.

Based on the results of the Inclusive Economic Development Index and poverty study, a policy discussion was held in the form of a Regional Development Forum entitled "Inclusive Economic Development for Sustainable Poverty Reduction" in West Java. The forum, which was held in July 2019, was attended by most representatives of *kabupaten/kota* governments in West Java and became a forum for knowledge exchange, not only between local governments, but also among academics and representatives of community organizations. At the national level, the results of the IPEI study in various regions were also used as material for the preparation of the Road Map toward Inclusive Economic Growth in Indonesia, which is the 2020–2024 National Medium-term Development Plan (RPJMN) Background Study and was compiled together with Bappenas with the support of Knowledge Sector Initiative. 🐟

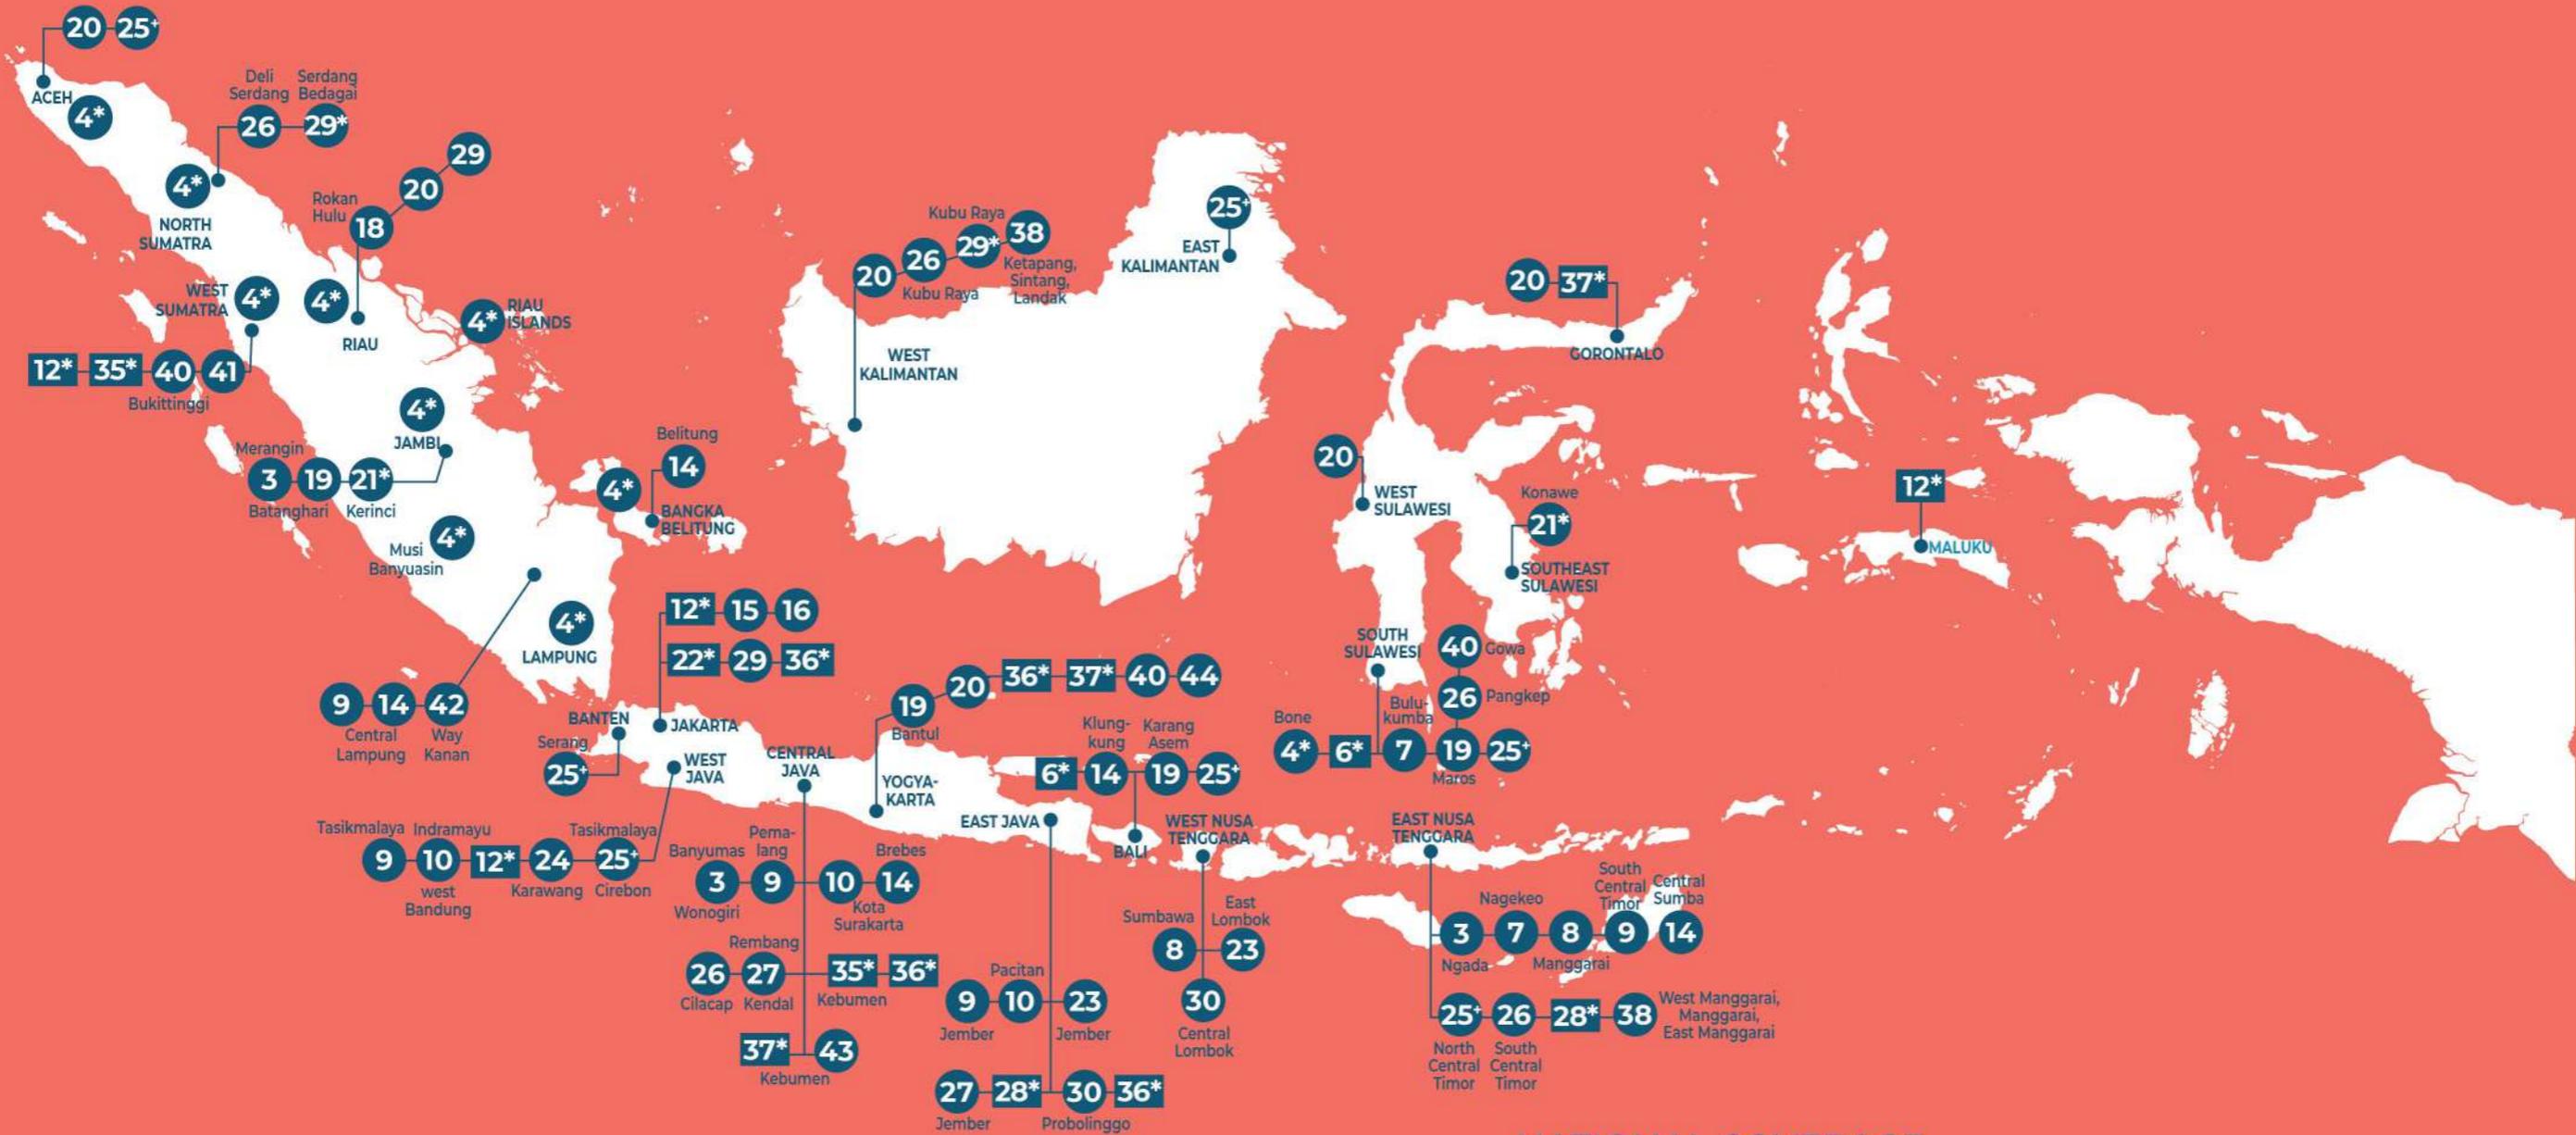

The government needs to push for the creation of economic development policies that are more inclusive by increasing access and opportunities for all sections of society, especially the poor and those who have been marginalized, to be involved and to reap the fruits of development.

# NONRESEARCH HIGHLIGHTS

## Press Talk: Quality Digital Economic Growth

SMERU hosted a media briefing titled “Quality Digital Economic Growth” on 15 August 2019. This event presented speakers from the Ministry of National Development Planning/ National Development Planning Agency (Bappenas), Gojek, and Lembaga Demografi of the Faculty of Economics and Business, Universitas Indonesia, and invited journalists from various media outlets. The event was aimed at spreading the discourse on quality digital economic growth in the digital revolution era.

## Training on Poverty Reduction Policy Analysis

SMERU collaborated with State Administration Institute of the Republic of Indonesia (LAN RI), Knowledge Sector Initiative (KSI), and Association of Indonesian Policy Analysts (AIPA) to host Training on Poverty Reduction Policy Analysis in Jakarta from 3 to 5 December 2019. This event’s participants were those from state civil apparatus (ASN) and non-ASN. The training session offered basic understanding on the contexts, concepts, and basic techniques for evidence-based analysis of poverty reduction policies.

## Forum Pembangunan Daerah

SMERU collaborated with the West Java Provincial Government to organize the 2019 Regional Development Forum themed “Inclusive Economic Development for Sustainable Poverty Reduction in West Java” on 30 July 2019. This event was supported by DFAT-Australia, Knowledge Sector Initiative, Ford Foundation, Ministry of Home Affairs, PT Kereta Api Indonesia, and PT Telkom Indonesia.

## The 12<sup>th</sup> Asia Pacific Future Trends Forum (FTF)

On 21 November 2019, SMERU acted as a partner organizer of the 12th Asia Pacific Future Trends Forum (FTF), an annual forum which gathers main stakeholders of healthcare sector in the Asia Pacific region to discuss various issues of common concern in the healthcare system. The theme of the 2019 FTF was “Roadmap to Universal Health Care: Acceleration through Public-Private Partnership”.

## 21 RESEARCH REPORTS

1. The Well-Being of Poor Children Left by Their Mothers who Become Migrant Workers: Case Study in Two Kabupaten in Indonesia [Kesejahteraan Anak Keluarga Miskin yang Ditinggal Ibu Pekerja Migran: Studi Kasus di Dua Kabupaten di Indonesia]

Mayang Rizky, Yudi Fajar M. Wahyu, Hafiz Arfyanto, Sofni Indah Arifa Lubis, Emmy Hermanus, Joseph Natanael Marshan, Nila Warda, Niken Kusumawardhani, Nina Toyamah
2. Testing Small Area Estimation (SAE) Method for Generating Nutrition Maps in Indonesia: Rokan Hulu District [Penguujian Metode Small Area Estimation (SAE) untuk Pembuatan Peta Status Gizi di Indonesia: Kabupaten Rokan Hulu]

Asep Kurniawan, Elza Elmira, Maudita Dwi Anbarani, Mayang Rizky, Nurmala Selly Saputri, Ridho Al Izzati, Ruhmaniyati
3. Penguujian Metode Small Area Estimation (SAE) untuk Pembuatan Peta Status Gizi di Indonesia: Kabupaten Rokan Hulu

Asep Kurniawan, Elza Elmira, Maudita Dwi Anbarani, Mayang Rizky, Nurmala Selly Saputri, Ridho Al Izzati, Ruhmaniyati
4. Laporan Tematik Studi Midline MAMPU Tema 1: Akses Perempuan Miskin terhadap Program Perlindungan Sosial

Dyan Widyaningsih, Niken Kusumawardhani
5. Laporan Tematik Studi Midline MAMPU Tema 2: Akses Perempuan Miskin Pekerja Rumah Tangga terhadap Perlindungan Sosial Tenaga Kerja

Ana Rosidha Tamyis, Nila Warda
6. Laporan Tematik Studi Midline MAMPU Tema 3: Akses Perempuan Buruh Migran Luar Negeri terhadap Layanan Perlindungan

Stella Aleida Hutagalung, Veto Tyas Indrio
7. Laporan Tematik Studi Midline MAMPU Tema 4: Meningkatkan Status Kesehatan dan Gizi Perempuan

Dyan Widyaningsih, Elza Elmira, Dinar Dwi Prasetyo
8. Laporan Tematik Studi Midline MAMPU Tema 5: Pengurangan Kekerasan terhadap Perempuan

Ana Rosidha Tamyis, Niken Kusumawardhani, Fatin Nuha Astini
9. Laporan Sintesis Studi Midline Mampu: Akses Perempuan Miskin terhadap Layanan Publik pada Lima Tema Penghidupan

Dinar Dwi Prasetyo, Dyan Widyaningsih, Ana Rosidha Tamyis, Niken Kusumawardhani
10. Studi Tematik Undang-Undang Desa Merancang Strategi dan Skenario Pendampingan di Desa

Palmira Permata Bachtiar, Asep Kurniawan, Rendy Adriyan Diningrat, Gema Satria Mayang Sedyadi, Ruhmaniyati
11. Laporan Studi Kasus Undang-Undang Desa: Menelusuri Manfaat Belanja Desa

Palmira Permata Bachtiar, Asep Kurniawan, Gema Satria Mayang Sedyadi, Rendy Adriyan Diningrat, Ruhmaniyati, Ulfah Alifia
12. Kajian Penyelenggaraan SMP Terbuka di Provinsi DKI Jakarta

Asep Kurniawan, Elza Elmira, Maudita Dwi Anbarani, Mayang Rizky, Nurmala Selly Saputri, Ridho Al Izzati, Ruhmaniyati
13. Keteringgalan dalam Kemakmuran: Tantangan Kemiskinan di Kabupaten Pangkajene dan Kepulauan

Widjajanti Isdijoso, Mayang Rizky, Veto Tyas Indrio, Ana Rosidha Tamyis
14. Studi Implementasi Undang-Undang No. 6 Tahun 2014 tentang Desa - Laporan Endline

Palmira Permata Bachtiar, Asep Kurniawan, Gema Satria Mayang Sedyadi, Rendy Adriyan Diningrat, Ruhmaniyati
15. EINRIP Monitoring & Evaluation Post Improvement Qualitative Social Research: Monitoring Report 2018 [Kajian Pemantauan dan Evaluasi Sosial Kualitatif Pascaperbaikan EINRIP: Laporan Pemantauan 2018]

Dinar Dwi Prasetyo, Dyan Widyaningsih, Rezanti Putri Pramana, Steve Christiantara
16. Menstrual Hygiene Management (MHM): A Case Study of Primary and Junior High School Students in Indonesia [Manajemen Kesehatan Menstruasi: Studi Kasus Siswa SD dan SMP di Indonesia]

Hastuti, Rika Kumala Dewi, Rezanti Putri Pramana
17. Studi Kasus Manajemen Kebersihan Menstruasi (MKM) Siswa SD dan SMP di Indonesia

Hastuti, Rika Kumala Dewi, Rezanti Putri Pramana
18. Gender and Social Inclusion (GESI) Contextual Analysis/Formative Research for the Plan's Water for Women Indonesia [Analisis Kontekstual/Penelitian Formatif Kesetaraan Gender dan Inklusi Sosial (GESI) untuk Program Water for Women (WfW) Plan Internasional di Indonesia]

Dinar Dwi Prasetyo, Fatin Nuha Astini, Rizki Fillaili, Herry Widjanarko
19. Analisis Kontekstual/Penelitian Formatif Kesetaraan Gender dan Inklusi Sosial (GESI) untuk Program Water for Women (WfW) Plan Internasional di Indonesia

Dinar Dwi Prasetyo, Fatin Nuha Astini, Rizki Fillaili, Herry Widjanarko
20. Diagnostic Study of Child Labour in Rural Areas (with Special Emphasis on Tobacco Farming) [Studi Diagnostik Pekerja Anak di Wilayah Perdesaan (dengan Penekanan Khusus pada Perkebunan Tembakau Rakyat)]

Emmy Hermanus, Stella Aleida Hutagalung, Rezanti Putri Pramana, Fatin Nuha Astini, Elza Elmira, Veto Tyas Indrio, Widjajanti Isdijoso
21. Studi Diagnostik Pekerja Anak di Wilayah Perdesaan (dengan Penekanan Khusus pada Perkebunan Tembakau Rakyat)

Emmy Hermanus, Stella Aleida Hutagalung, Rezanti Putri Pramana, Fatin Nuha Astini, Elza Elmira, Veto Tyas Indrio, Widjajanti Isdijoso

## 7 WORKING PAPERS

1. Education in Indonesia: A White Elephant? [Pendidikan di Indonesia: Sebuah Kemubaziran]

Sandra Kurniawati, Daniel Suryadarma, Luhur Bima, Asri Yusrina
2. Understanding Metropolitan Poverty: The Profile of Poverty in Jabodetabek Area [Memahami Kemiskinan Metropolitan: Profil Kemiskinan di Wilayah Jabodetabek]

Asep Suryahadi, Cecilila Marlina
3. Dinamika Ketimpangan dan Penghidupan di Perdesaan Indonesia, 2006–2016

Nila Warda, Rachma Indah Nurbaní, Elza Elmira, Ridho Al Izzati, Mayang Rizky
4. Bagaimana Mencegah Peningkatan Ketimpangan dalam Desa?

Nila Warda, Elza Elmira, Mayang Rizky, Rachma Indah Nurbaní, Ridho Al Izzati
5. Gender Equality in Indonesian New Developmental State: The Case of the New Participatory Village Governance [Kesetaraan Gender dalam Situasi Pembangunan Terkini di Indonesia: Kasus Tata Kelola Desa yang Partisipatoris]

Nila Warda, Elza Elmira, Mayang Rizky, Rachma Indah Nurbaní, Ridho Al Izzati

## 1 ANNUAL REPORT

- Annual Report 2018

## 4 JOURNAL ARTICLES

# POLICY ENGAGEMENT

## POVERTY

- Providing recommendations for the Ministry of Social Affairs on efforts to improve the livelihoods of the Household Conditional Cash Transfer program (PKH) beneficiary families
- Giving a training session titled "Poverty Reduction Policy Analysis Training" to the state civil apparatus (ASN) and non-ASN participants
- Delivering recommendations to the West Java Provincial Government regarding inclusive economic development for sustainable poverty reduction in West Java.

## INEQUALITY

- Sending a memo titled "Perspective on the Current Situation of Inequality in Indonesia" to the National Team for the Acceleration of Poverty Reduction (TNP2K)
- Assisting the National Development Planning Agency (Bappenas) in conducting background study for the development of 2020-2024 National Medium-Term Development Plan (RPJMN) on inclusive development
- Supporting Bappenas in developing and making use of the Inclusive Economic Development Index (IPEI) at the national level and in five provinces—West Java, Bali, East Kalimantan, Aceh, and South Sulawesi

## EDUCATION

- Providing recommendations for the Ministry of Research and Technology and the Directorate General of Higher Education on improving the quality of in-service teacher training program
- Conducting collaborative research for improving the quality of basic education in the Province of DKI Jakarta, Kota Yogyakarta, Kabupaten Kebumen, Kabupaten Way Kanan, and Kota Bukittinggi
- Helping the Ministry of Education and Culture improve the Cultural Development Index (IPK)

## URBAN DEVELOPMENT

- Providing the Ministry of Villages, Development of Disadvantaged Regions, and Transmigration (Kemendesa) and the National Industry and Economic Committee (KEIN) with recommendations on reducing inequality of development in rural areas
- Providing Kemendesa and Bappenas with recommendations on village governance in the context of Village Law implementation
- Providing Kemendesa with recommendations on efforts to develop village economy through the Rural Area Premium Products (Prukades) program

## FOOD & NUTRITION SECURITY

- Developing nutrition maps which provide nutritional status estimations of children under five years old at the village level in six *kabupaten* (districts)—Rokan Hulu, Jember, Timor Tengah Selatan, Tasikmalaya, Lampung Tengah, and Pemalang—in collaboration with TNP2K, the World Bank, and Tanoto Foundation
- Conducting a strategic review on food security and nutrition in collaboration with the World Food Programme (WFP)

## YOUTH AND GENDER

- Assisting Bappenas in conducting background study for the development of 2020-2024 RPJMN on Youth Development
- Providing Bappenas, the MAMPU Program, and MAMPU partners with recommendations based on the MAMPU study results about women's access to social protection, reproductive health services, protection for home and migrant workers, and protection services for domestic violence victims

## ECONOMIC DEVELOPMENT

- Providing the Ministry of Public Works and Housing, Bappenas, and Executive Office of the President of the Republic of Indonesia with recommendations regarding the theory of change of how the national road improvements have brought about socioeconomic impacts for the communities
- Helping Bappenas evaluate the regional developments of Aceh, Gorontalo, West Sulawesi, West Kalimantan, Yogyakarta, and Riau provinces

## DIGITAL ECONOMY

- Hosting a press talk on the inclusivity of Indonesia's digital economy
- Conducting an analysis of inclusive digital economy and organizing a series of discussions about this topic with relevant stakeholders

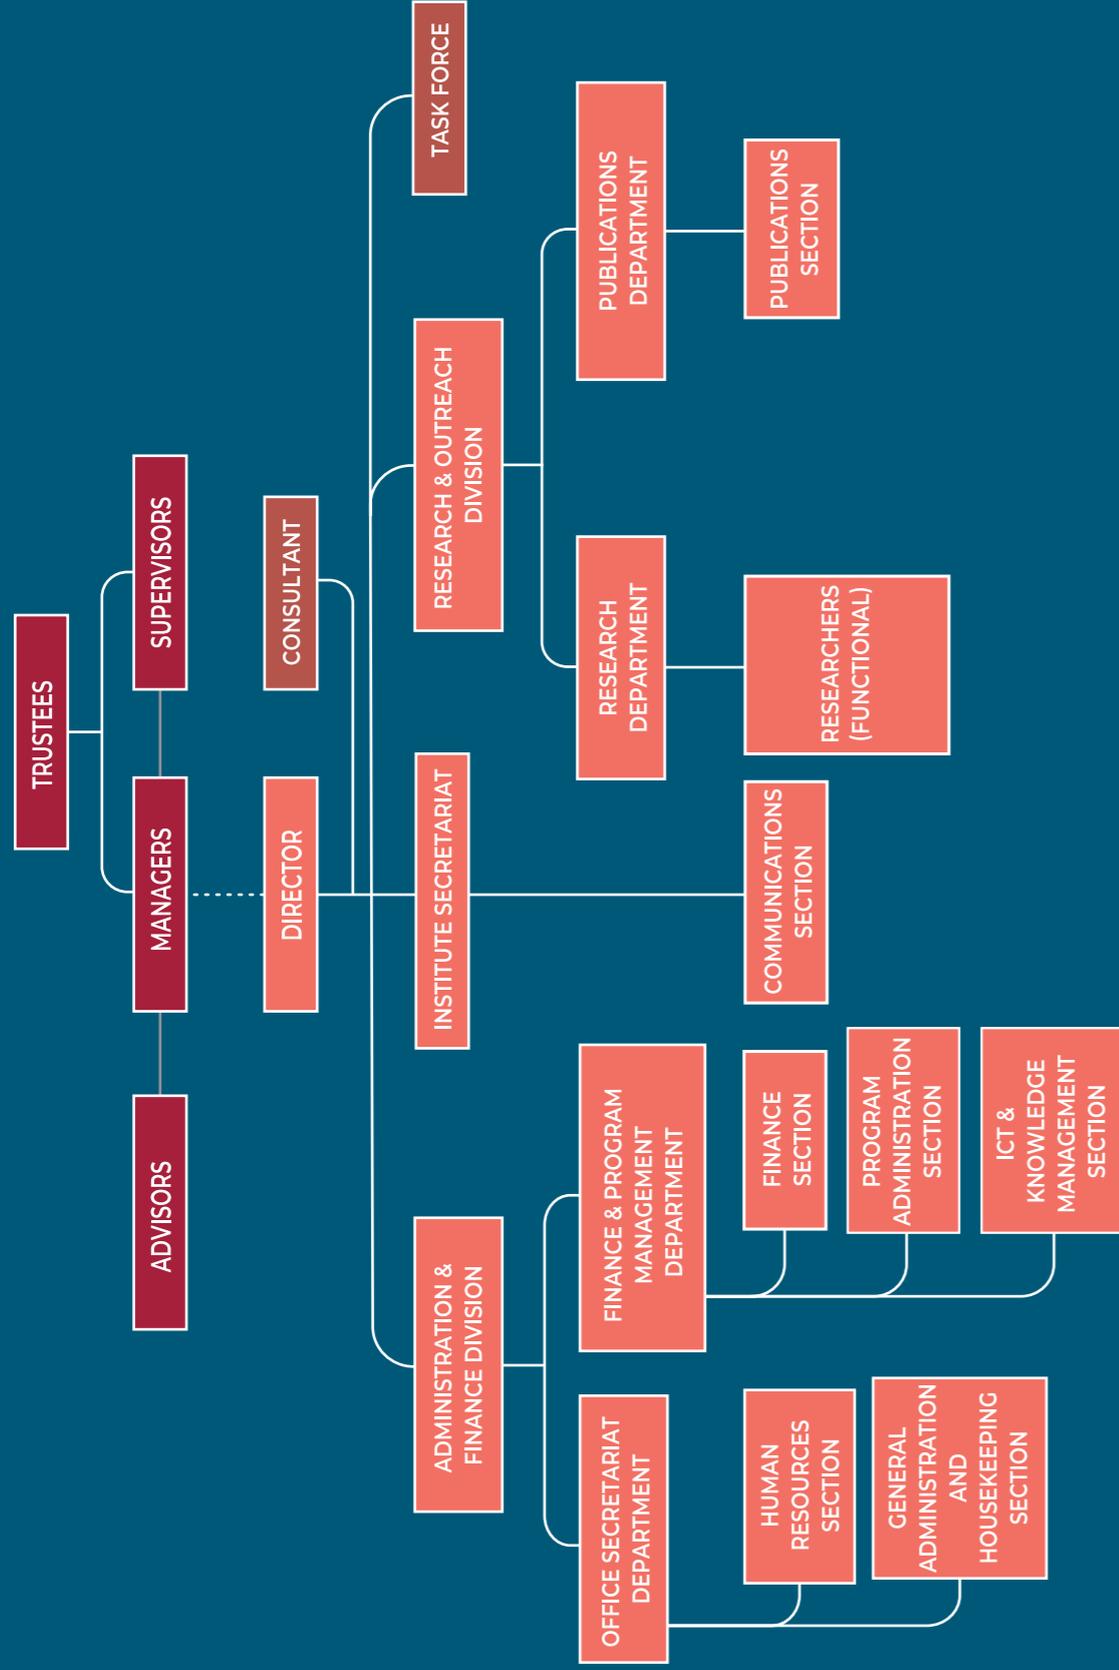

## MEDIUM-, SMALL-, AND MICRO-SCALE ENTERPRISES (UMKM)

- Providing the Ministry of Cooperatives and Small- and Medium-Sized Enterprises with policy recommendations as inputs about cooperatives and small- and medium-scale enterprises in the drafting of Omnibus Law
- Providing Bappenas, the Ministry of Cooperatives and Small- and Medium-Sized Enterprises, and public in general with recommendations on UMKM's entrepreneurial skill improvement

## OTHERS

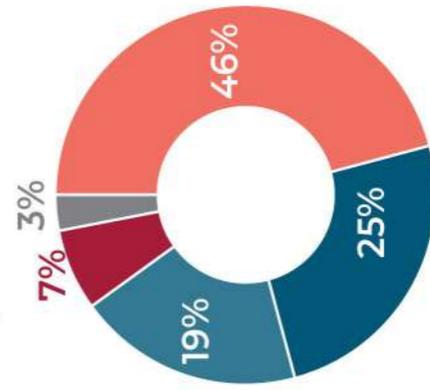

- Helping the Strategic Coordination Team for Strengthening Development Assistance (TKSP3) formulate national competency standards for development facilitators and conduct a validity test of the designed competency units
- Helping Bappenas update the Indonesian Democracy Index (IDI)

**Dr. Joan  
Hardjono**

**1936–2019**

## *Dr. Joan Hardjono: in Memoriam*

Dr. Joan Hardjono was an intellectual leader who was adept at policy research and had set a standard for high-quality socioeconomic and policy research. Joan passed on to us the passion to continue our research work because only by investing in thorough and accurate research can we assure the sustainable correlation between research, policy recommendation, and implementation strategy to encourage inclusive economic growth across Indonesia. Her work has inspired many Indonesian academics to conduct empirically accurate social research on how to reduce poverty and solve social issues while keeping in mind Indonesia's diversity and capacity.

Joan was not only an outstanding researcher, but also a mentor who always had time to give substantive feedback to SMERU staff's work and professional growth. Her patience, brilliance, and dedication had helped nurture SMERU to become one of the leading Indonesian policy research institutes nationally and internationally.
